GRUNDFOS

Possibility in every drop

Grundfos

- Grundlagt i 1945 i Bjerringbro
- Verdens førende pumpeproducent
- 22.000 medarbejdere
- 60+ lande
- 15.000.000 enheder pr. år

Purpose

Pioneer solutions to the world’s water and climate challenges and improve the quality of life for people

4 divisioner

Water Utility (WU)

for municipal, groundwater and irrigation end-users and channel partners

Commercial Building Services (CBS)

for distributors, installers and contractors, consultants and specifiers and facility management companies

Domestic Building Services (DBS)

for Installer customers and Distributor channel partners

Industry (IND)

for industrial water treatment and food & beverage, mobility, and general industry end-users

Forskellige brugere

Fra installatører til distributører, system builders, facility managers til operations managers, teknisk ansvarlig til bygherre, service udbydere til husejeren.

Selvom de specifikke behov og applikationer varierer, har de et fællestræk i behovet for state-of-the-art løsninger de kan stole på. Vores brugere er afhængige af vores produkter og løsninger.

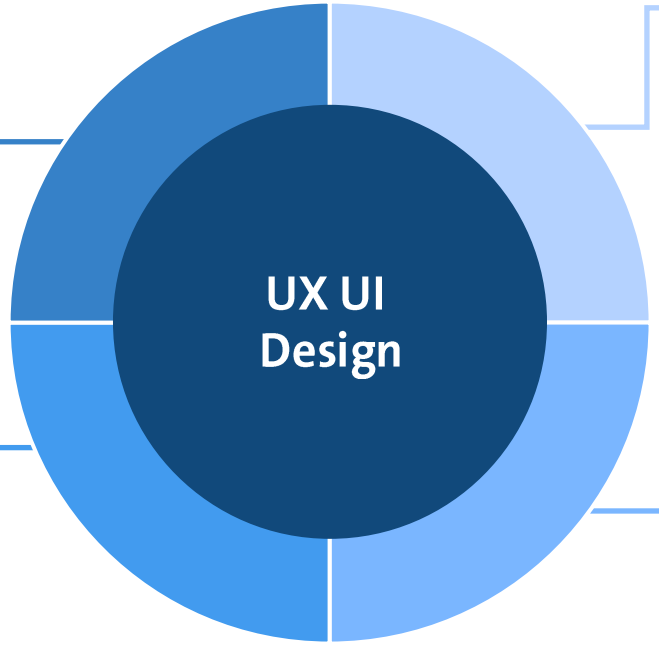
UXUI Design i Grundfos

- Group niveau kombineret med de 4 divisioner
- UX UI Design Platform på group niveau
- Samarbejde med design kompetencer i hver division
- Leverancer på mange forskellige niveauer

UX UI Design i Grundfos

UX design

Involved early in the development process to understand and prioritize the value propositions based on user feedback, testing & research.



Platform design

Closely working with product designers, UI & UX designers to keep design solutions, both physical and digital aligned and coherent across our product portfolio. Deliveries are often in the form of guidelines and processes.

Product design

Instrumental in developing and maintaining physical and digital products and offerings. They are involved in identifying legacy design contradictions and help create coherent design solutions for future products.

UI/Interaction design

Involved in developing design visions, executing and creating optimized UI solutions based on our department vision and mission. They are never considered a project resource but a resource utilized to lead & develop directions and paths to be followed holistically.

Innovation Research Hub

- Tættere forbindelse mellem produktudviklingen og brugere
- Validering af brugerbehov og kommerciel værdi
- Forankring i projektteamet
- Læringssprints og dual-track

Læringssprints & dual-track

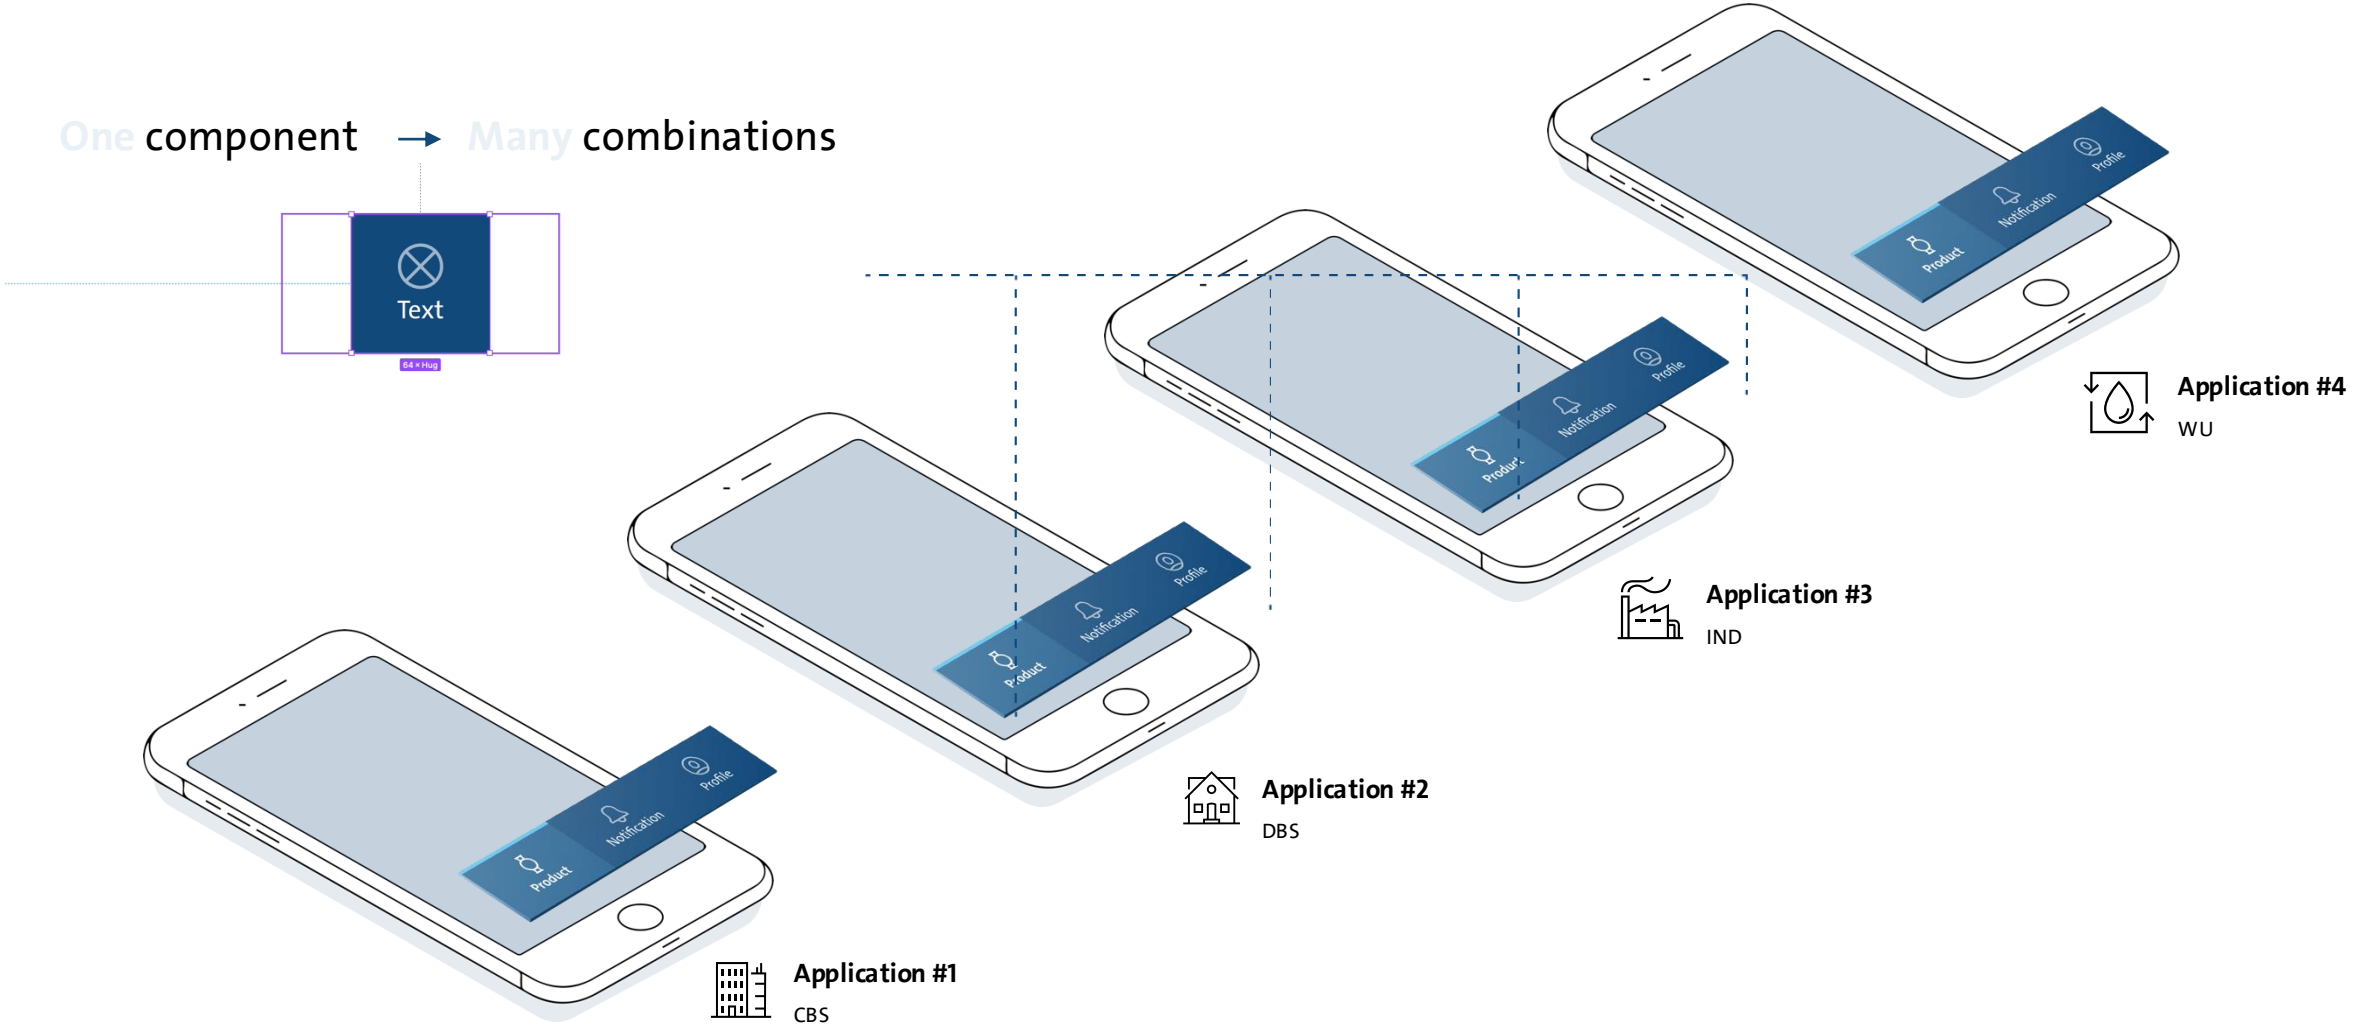
Grundfos Design system

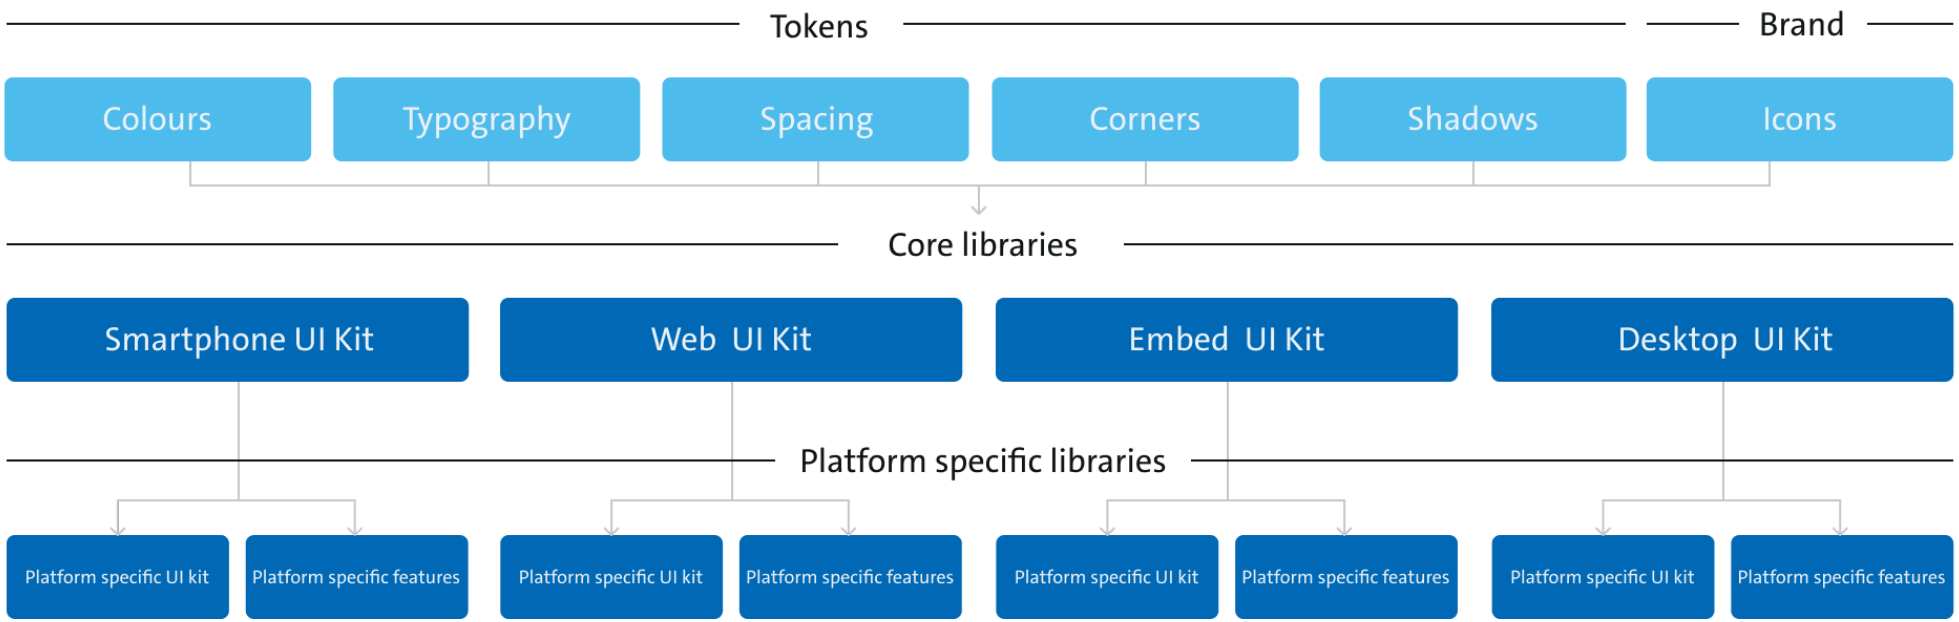
- Skalering af design
- Alignment på tværs af projekter
- Konsistens og sammenhæng
- Quality Assurance
- Platform features og UI kits

Grundfos Design System

One component → Many combinations

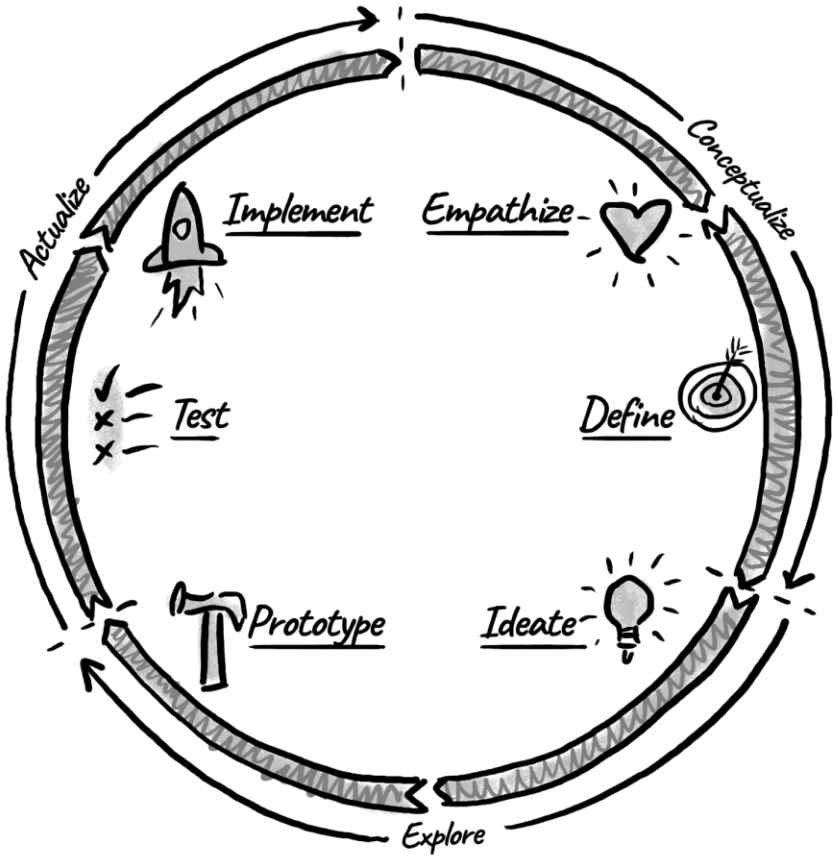


Grundfos Design System



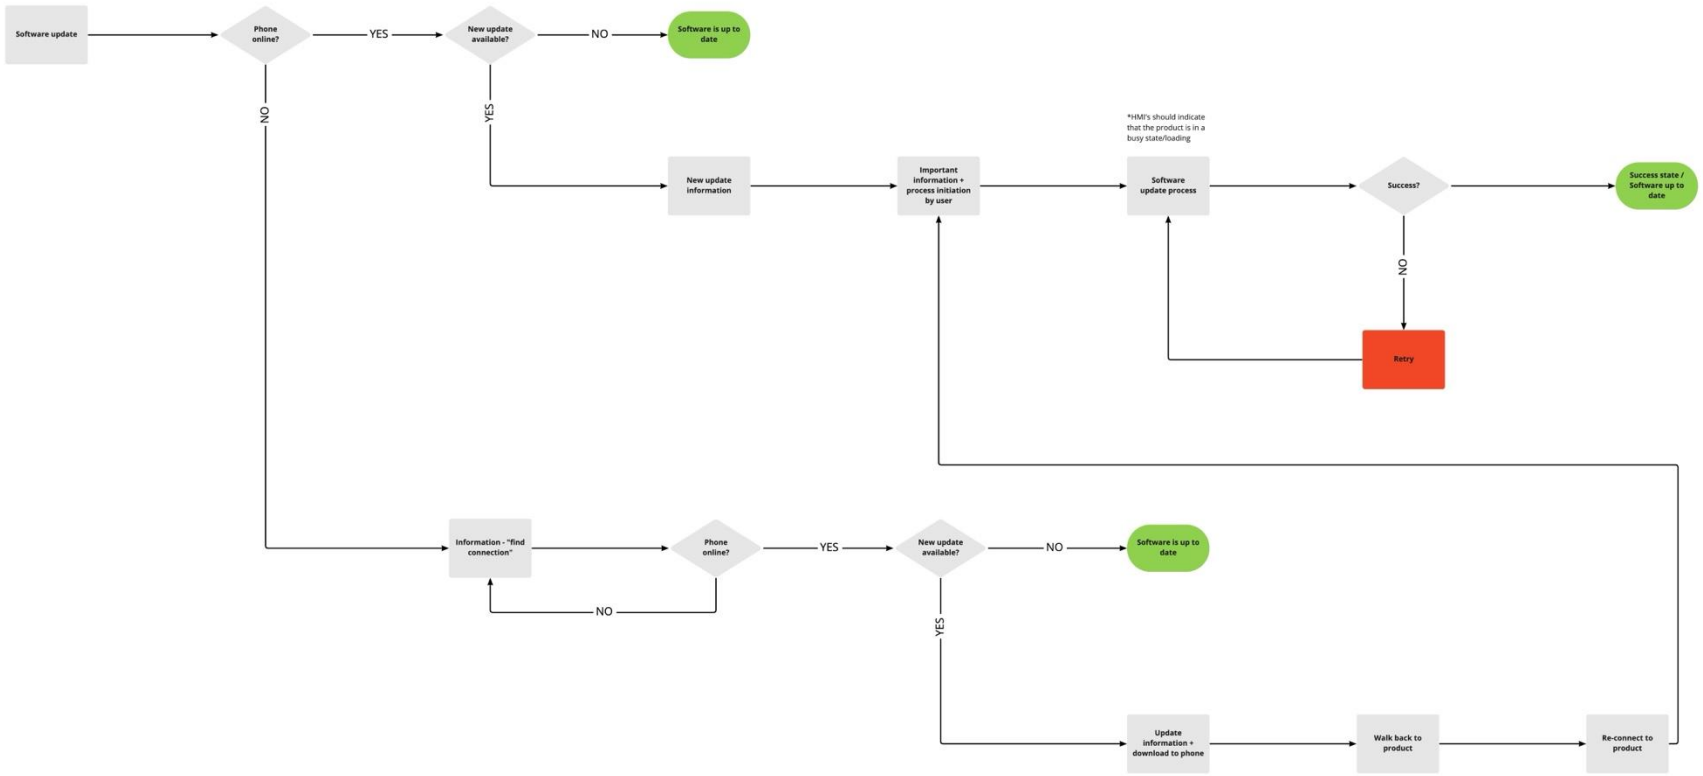
Platform design

- Indsigter og research
- Experience architecture
- Komponenter og platform features
- Hele projektleverancer



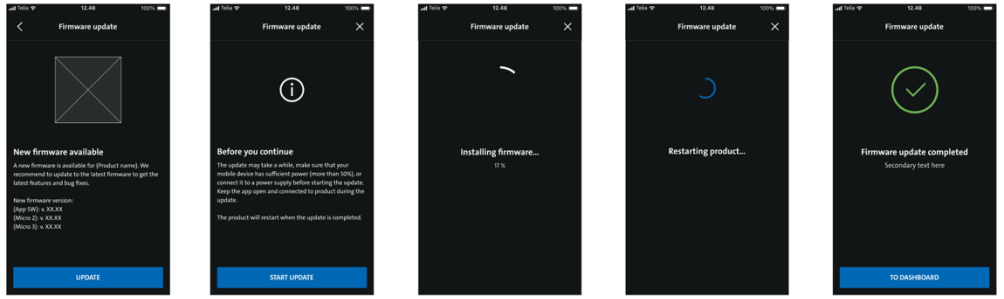
UX architecture

Software update - User flow



Platform UI

New firmware available



No Grundfos cloud connection
